A 3D perspective view of the completed LEGO Technic assembly. The structure features two long, parallel arms extending from a central mechanism. The left arm is a long white Technic beam with a series of black pins or axles inserted along its length. The right arm is a similar white beam, also with black pins. The central mechanism consists of a black Technic frame with a white Technic beam running through it. A black Technic motor or actuator is attached to the top of this central frame. The entire assembly is built using a combination of white and black Technic beams and pins.
